

Security Cages

– 2" x 2" x 8g MESH GALVANISED

Galvanised Mesh Security Cages – safe, strong and durable protection

We supply high quality mesh security cages that are designed to protect parts or storage, for both internal and external applications. Each can be used for the secure storage of gas bottles, cylinders and tools.

Specification

Each galvanised security cage is constructed from galvanised panels, consisting of cold-rolled angle framework 43 x 43 x 2mm, cold-rolled T-bar 32 x 32 x 0.7mm and mesh sheets 50 x 50 x 3.5mm (8g). These are then hot dip galvanised to conform to BS EN ISO 1461.

Cages may be fitted with optional roofs. Each installation is manufactured to suit a particular requirement, but may be altered or relocated with ease.

We can offer heavier pattern mesh from the Expamet range if required.

There is also the option to upgrade cage locks.

“Our vision is to be the supplier of choice for warehouse and industrial identification, safety systems and associated products, offering clients a quality-driven, total solution via multi-channel procurement methods.”

Tony Gresty
Managing Director – Warehouse Partners

Labelling and Safety Solutions to reduce time and costs
