

Steel Partitioning – DOUBLE SKIN

This quality partitioning system is excellent for use in applications such as test areas, security stores, comms rooms, and clean production areas. Other installations can include works admin offices and design offices.

Panels are constructed from 25.4 x 42 x 25.4 x 1.2mm (18g) cold rolled channels panelled both sides with 0.8mm (21g) CR4 mild steel sheet with 30mm Rockwool mineral fibre infill and are joined together using an “H” section, making the installation very similar to the installation of composite partitioning systems. Panels are available in solid, half-glazed, solid/glazed/solid or borrowed light elevation.

We produce fully detailed layouts for any proposal prior to the commencement of work.

Standard panel sizes

Height	2400, 2700, 3000mm
Width	1000mm
Dado Height	1200mm
Thickness	47mm

A range of infill and special size panels can be supplied to maintain final dimensions.

Glazing

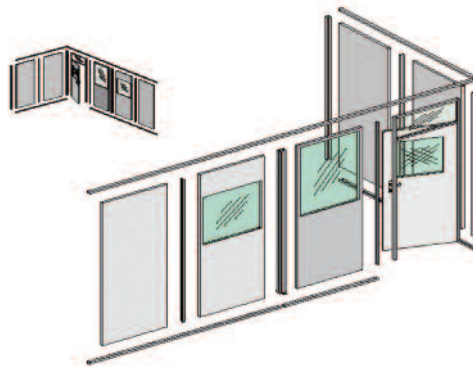

6mm Clear Toughened Glass is supplied as standard. However, other types of glass and Perspex may also be fitted as required.

Paint finish

All panels are electrostatically powder-coated in the following standard colours: Grey 10 A 07, Grey 00 A 05, Sandstone 08 B 17 and Stone 10 B 17. Special colours (over 100 in stock) are available at extra cost.

Accessories

A comprehensive range of accessories, including drop-down and sliding hatches, louvres, vents and locking systems are available to order.

“Our vision is to be the supplier of choice for warehouse and industrial identification, safety systems and associated products, offering clients a quality-driven, total solution via multi-channel procurement methods.”
