

Line Marking

We are market leaders in internal line marking, providing a host of varying grades and methods of line marking products to suit floor designs and durability requirements.

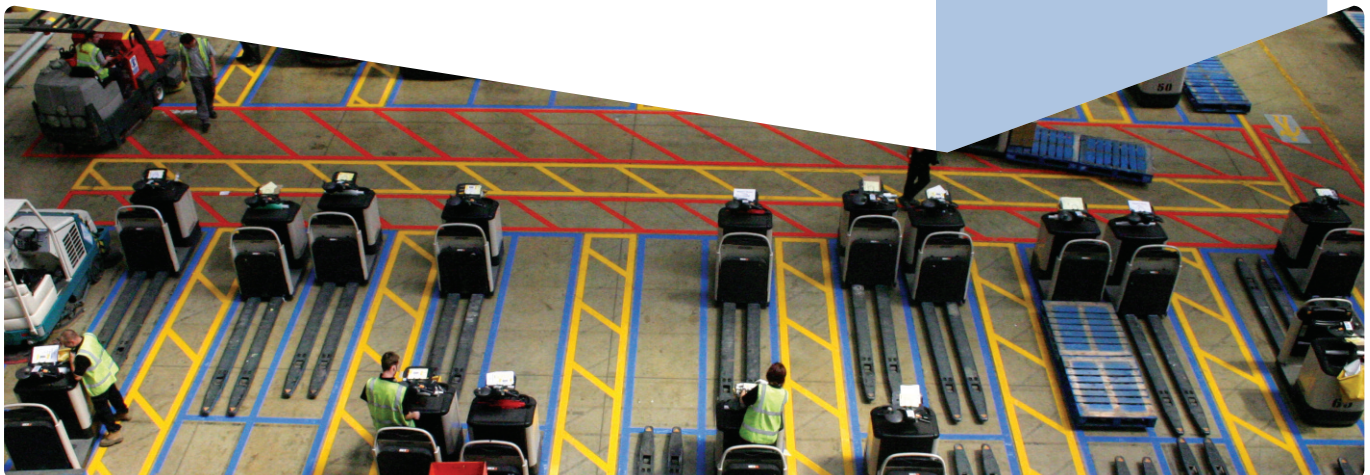

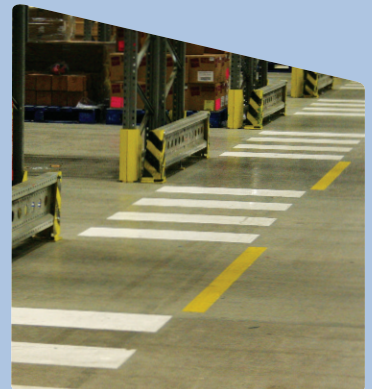

Our line marking and walkway solutions cover a wide range of requirements for indoor applications. Design aspects are covered in consultation with the customer and then drawn so that working models can be discussed and approved prior to installation.

Assistance with key issues will be discussed during site visits. We believe we are the only company in the UK to offer a complete solution in-house from conceptual design & planning through to installation that optimise customer operations and meets today's strict facility safety requirements.

Additionally we offer:

- Full consultancy and planning
- Health & Safety Risk Assessment guidance
- Weekend & night installation available to minimise disruption to operations
- Resistance to a wide range of chemicals dependent on option chosen
- Range of preparation methods available for chosen level of durability
- Our line marking can be cleaned using conventional methods dependent on option chosen

We work in-line with many worldwide business practices to achieve a uniform safety system.

“Our vision is to be the supplier of choice for warehouse and industrial identification, safety systems and associated products, offering clients a quality-driven, total solution via multi-channel procurement methods.”

Tony Gresty
Managing Director – Warehouse Partners
