

SilverBack™ Racking Labels

SilverBack™ is a new label solution which can be adhered in all warehouse temperatures

Label solutions can be varied in both man-down and man-up fork lift pallet racking applications. We aim to design the most appropriate and cost-effective application.

1. Split Beam Label

To identify a location on the ground and a pallet on the first beam level.

2. Upper Beam Label

To identify a location on beams above the split beam label location. On man-up applications where the operator is closer to the label these can be smaller than in man down applications.

3. Upright Label

Applied to the racking upright and used in man-down applications to enable the operator to scan upper locations at low level.

4. Stepped Beam Label

Also used in man-down applications but applied to the beam to enable the operator to scan upper locations at low level.

5. Level Indicator

A simple but cost-effective way of identifying a beam level in man-down applications. A coloured label is applied to the beam and matches the location colour shown on the upright or stepped beam label.

Lifetime scanning guarantee for all laminated labels.

“Our vision is to be the supplier of choice for warehouse and industrial identification, safety systems and associated products, offering clients a quality-driven, total solution via multi-channel procurement methods.”

Tony Gresty
Managing Director – Warehouse Partners

Labelling and Warehouse Solutions to reduce time and costs

Products available:

- Location labels, aisle markers and identification products
- RackNets™ safety netting and other safety netting products
- Warehouse safety products including safety signs and barriers, right through to floor and line marking solutions
- Label holders to provide a range of ID solutions for shelving
- Load notice signs (SEMA signs)
- Pallite® Pix® picking solutions
- Machine guarding
- Mesh partitioning and security fencing
